

This 5 shank deep tillage cultivator, has a working width of 10 to 11 feet. The subsoiler has best results at 14 to 18 inches deep with minimum horsepower requirement of 250 HP. The purpose of subsoiling is to fracture the hardpan so the water , especially in spring can soak into the ground deeper and allow any nutrients to move up.

Kello Bilt Subsoiler:

\$3.00/acre + \$50.00/day
plus GST
