

July 29, 2021

Dear Producer,

British Columbia is currently experiencing an unprecedented heat wave, with unseasonably high temperatures. AgriStability can help mitigate risks associated with the current heat wave. Production loss, unexpected and increased expenses as well as quality loss are all examples of the risks that can be covered under AgriStability.

We hope you are enrolled in the program. However, if you are not, we recommend you consider enrolling in the AgriStability program. To participate in the 2021 Program Year, you must request a New Participant Package via phone or email by **June 30th**.

You will have 30 days from the mailing date of the New Participant Package to confirm your participation.

Please call us toll free at 1 877 343-2767 or visit our [website](#).

We encourage all producers to enrol in the B.C. AgriStability program.

Sincerely,

AgriStability Administration
